Cibitung, Bekasi, East Java, Indonesia

Informatics graduate (3.73 GPA) and experienced Software Engineer specializing in backend development and applied AI. Adept at leading teams and architecting production-ready systems (NestJS, Laravel, Python) to optimize operational efficiency and drive business value.

Work Experiences

Daylight - **Remote** Feb 2026 - Present

Backend Engineer (Freelance)

- Spearheaded the backend architecture migration for the "Foldin" web from a NestJS monolith to highly scalable Go (Echo) microservices, enhancing system performance and modularity.
- Deployed robust event registration and waitlist modules utilizing Prisma and Docker, accelerating deployment cycles by ~30% and ensuring high availability for 500+ anticipated users.

Self-Employed (via projects.co.id) - **Remote** Feb 2025 - Present

Web Developer (Freelance)

- Engineered a high-performance backend API for Tokudigital.com using NestJS, securely orchestrating complex payment data logic and successfully integrating third-party payment gateways (Xendit) to handle various payment methods.
- Architected a secure mobile backend using NestJS and Supabase, implementing a strict 3-tier Role-Based Access Control (RBAC) and integrating Firebase Cloud Messaging (FCM) to enable reliable, real-time administrative push notifications.
- Built a scalable backend for a Blood Sugar Monitoring application utilizing NestJS and Drizzle ORM, designing optimized database queries to ensure efficient and secure health data management.
- Developed a comprehensive Student Asset Lending System via Laravel 11, building core features for dynamic inventory management, automated tracking, and secure asset lending workflows.
- Streamlined academic workflows by building 'SILAT' (Internship Administration System) using PHP, effectively digitizing manual administrative processes and improving overall data accessibility.

Al-Irsyad Al-Islamiyyah - **Purwokerto** Mar 2025 - Dec 2025

Robotics Extracurricular Instructor

- Mentored and facilitated a class of 30 students in robotics fundamentals, cultivating problem-solving skills and foundational programming knowledge through structured weekly sessions.

POP TB Indonesia (Bakrie Center Foundation) - **West Jakarta** Sep 2024 - Jan 2025

IT Development Intern

- Revamped the corporate profile website utilizing WordPress to significantly enhance the organization's digital presence and user interface.
- Executed comprehensive Quality Assurance (QA) testing over a 4-month period for two primary platforms: the laportbc.id web portal and the LaporTBC mobile application.
- Delivered weekly QA and bug-tracking reports, providing actionable insights to ensure continuous application stability and optimal performance.

B - Universe - **Tangerang** Jul 2024 - Aug 2024

Data Entry and Web Developer Intern

- Managed and audited an inventory database of over 3,000 enterprise assets distributed across two warehouse facilities.
- Engineered an AI-powered chatbot within the Asset Management System utilizing Flowise AI, significantly streamlining data retrieval and search capabilities for operational efficiency.

Jendral Soedirman University - **Purbalingga** Aug 2023 - Jun 2025

Assistant Laboratory Coordinator & Teaching Assistant

- Secured the teaching role from a highly competitive top 5% applicant pool, progressing to Laboratory Coordinator to direct operations and lead 5 teaching assistants.
- Instructed and mentored over 190+ students across multiple semesters in core IT subjects, including Computer Networks (Cisco Packet Tracer), Data Structures, and Algorithms (C++).
- Authored 4 comprehensive practicum modules via Notion and formulated secure assessments via Safe Exam Browser, rigorously evaluating and standardizing the curriculum.

Education Level

Universitas Jenderal Soedirman - **Purwokerto** Aug 2022 - Jun 2026 (Expected)

Bachelor of Informatics, 3.73/4.00

- Final Thesis ("Sapa"): Developed a Telegram-based multi-agent counseling chatbot utilizing Retrieval-Augmented Generation (RAG) architecture, rigorously evaluated with BERTScore to achieve an exceptional 85 average performance score.
- Analisaham AI Project: Built an automated market intelligence Telegram bot utilizing Python and Groq LLM, scraping and processing 100+ daily financial news articles from IDX and Bloomberg for real-time sentiment analysis.
- Real-Time Backend Project: Engineered a scalable chat architecture using the MERN stack and Socket.io, enabling seamless, instant user communication with sub-second message latency.
- Academic Leadership: Led the Informatics Class of 2022 as Chairman, orchestrating academic initiatives and mobilizing over 100+ students for various university events.
- National Achievement: Selected as a Finalist in the National Competitive Programming PINGFEST 2023, competing against top nationwide tech talents.

Organisational Experience

Himpunan Mahasiswa Informatika - **Universitas Jenderal Soedirman** Jun 2023 - Nov 2023

Chairman Soedirman Technophoria

- Led and managed a cross-functional team of 55 volunteers, strategically delegating tasks to execute a large-scale national seminar and UI/UX competition.
- Surpassed the seminar participant acquisition target by over 10% through effective outreach and event promotion.
- Drove a 15-25% increase in social media followers by directing the creation and distribution of high-value, informative content.

Skills, Achievements & Other Experience

- **Best Graduate Machine Learning Engineer Dicoding DBS Foundation** (2025): Machine Learning, Python
- **Fullstack Web Developer** (2024): MERN Stack
- **Hard Skills** (2024): Algorithm, Data Structure, OOP(Object Oriented Programming), C++, Python
- **Modules Taken** (2024): Python Course by Dicoding
- **Modules Taken** (2024): Machine Learning Course by Dicoding
- **Frontend Web Developer** (2023): TailwindCSS, Bootstrap, ReactJS
- **Backend Web Developer** (2023): Laravel, PHP MVC, MySql
